Investment Objective

To provide as high a level of current income exempt from federal income tax as the Advisor believes is consistent with the preservation of capital. The Series invests primarily in municipal bonds that provide income exempt from federal income tax.

May be Appropriate for Investors:

- Seeking income that is exempt from federal income taxes
- Seeking a long-term investment and who are willing to accept the risk of interest rate fluctuations
- Seeking to diversify a portfolio by adding a municipal bond component

A Word About Risk

All investments involve risks, including possible loss of principal. There is an inverse relationship between bond prices and interest rates; as interest rates rise, bond prices (and therefore the value of bond funds) fall. Likewise, as interest rates fall, bond prices and the value of bond funds rise. The income earned by the Series may be subject to the Alternative Minimum Tax (AMT), depending on your tax situation.

Credit quality ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest). Not Rated is used to classify securities for which a rating is not available. Credit quality ratings for each issue are obtained from Bloomberg using ratings derived from Moody's Investors Services (Moody's) or Standard & Poor's. When ratings from Moody's are not available, ratings from Standard & Poor's are used. Investments will change over time. Top Ten Investments list is unaudited and excludes cash.
