Investment Objective

To provide long-term capital growth.

Investment Strategy

The portfolio is invested in an aggressive, growth-oriented mix of securities that seeks to earn the long-term growth typically associated with the stock market. Holdings are diversified primarily among various stock investments in both domestic and foreign markets; only a minor portion of the fund is invested in fixed income securities.

The fund manager will adjust the investment mix over time to manage risk by continually evaluating individual securities and market conditions to determine the relative attractiveness of each investment. In general, stock exposure will increase when valuations are low and decrease during speculative markets.

About Risk-Based Funds

Risk-based funds offer professional management and asset allocation through a choice of investment objectives that range from fairly aggressive to fairly conservative. All an investor has to do is determine which objective best suits his or her current risk tolerance and investment time horizon, then decide when to move to a different objective as his or her personal situation changes over the years.

Time Horizon and Range of Stock Exposure

Maximum Term	Extended Term	Moderate Term	Conservative Term
15+ Years	7 - 20 Years	3 - 10 Years	0 - 5 Years
70% - 95%	40% - 70%	20% - 60%	15% - 45%

May be appropriate for investors:

- Who seek long-term capital growth and generally have the time to withstand market volatility
- Who have a very high capital risk tolerance

Pro-Blend® Maximum Term Class I

A Word About Risk

All investments involve risks, including possible loss of principal. Because the fund invests in both stocks and bonds, the value of your investment will fluctuate in response to stock market movements and changes in interest rates. Investing in the fund will also involve a number of other risks, including issuer-specific risk, foreign investment risk, and small-cap/mid-cap risk. Investments in options and futures, like all derivatives, can be highly volatile and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. Also, the use of leverage increases exposure to the market and may magnify potential losses.

Inception performance is based on the Pro-Blend® Maximum Term Series Class S inception of 11/01/1995. For periods through 03/28/2008 (the inception date of the Class I shares), performance for the Class I shares is based on the historical performance of the Class S shares. Because the Class I shares invest in the same portfolio of securities as the Class S shares, performance will be different only to the extent that the Class S shares have a higher expense ratio. Performance data quoted represents past performance and does not guarantee future results. Performance for periods greater than one year is annualized. The investment return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than that quoted; investors can obtain the most recent month-end performance at www.manning-napier.com or by calling (800) 466-3863.

The 65/20/15 Blended Index is 65% Russell 3000® Index (Rusl 3000), 20% MSCI ACWI ex USA Index (MSCI ACWXU), and 15% Bloomberg Barclays U.S. Aggregate Bond Index (BB Agg). Rusl 3000 is an unmanaged index that consists of 3,000 of the largest U.S. companies based on total market capitalization. Index returns are based on a market capitalization-weighted average of relative price changes of the component stocks plus dividends whose reinvestments are compounded daily. Index returns provided by Bloomberg. MSCI ACWXU is designed to measure large and mid-cap representation across 22 of 23 Developed Markets countries (excluding the U.S.) and 24 Emerging Markets countries. The Index is denominated in U.S. dollars. The Index returns assume daily investment of gross dividends (which do not account for applicable dividend taxation) prior to 12/31/1998, as net returns were not available. Subsequent to 12/31/1998, the Index returns are net of withholding taxes. They assume daily reinvestment of net dividends thus accounting for any applicable dividend taxation. Index returns provided by Bloomberg. BB Agg is an unmanaged, market value-weighted index of U.S. domestic investment-grade debt issues, including government, corporate, asset-backed and mortgage-backed securities with maturities of one year or more. Index returns provided by Interactive Data. The returns of the indices do not reflect any fees or expenses. Returns provided are calculated monthly using a blended allocation. Because the fund's asset allocation will vary over time, the composition of the fund's portfolio may not match the composition of the comparative Indices. Mid-month performance may not be available for all indices within the blended index. Where applicable, performance for those indices is included from the first of the month following the corresponding Fund's inception date. The Manning & Napier Fund, Inc. is managed by Manning & Napier Advisors, LLC. Manning & Napier Investor Services, Inc., an affiliate of Manning & Napier Advisors, LLC, is the distributor of the Fund shares.
